

**Classes for each training datapoint**

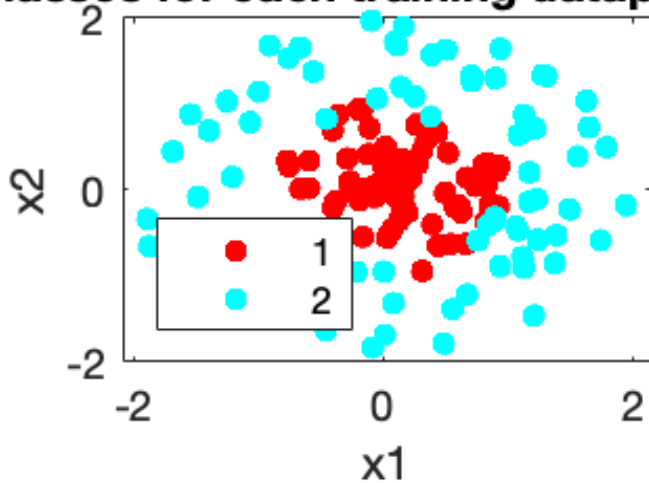

The models accuracy on the training dataset, with a hidden layer of size two, is 85.62

**Classes for each test datapoint(t**

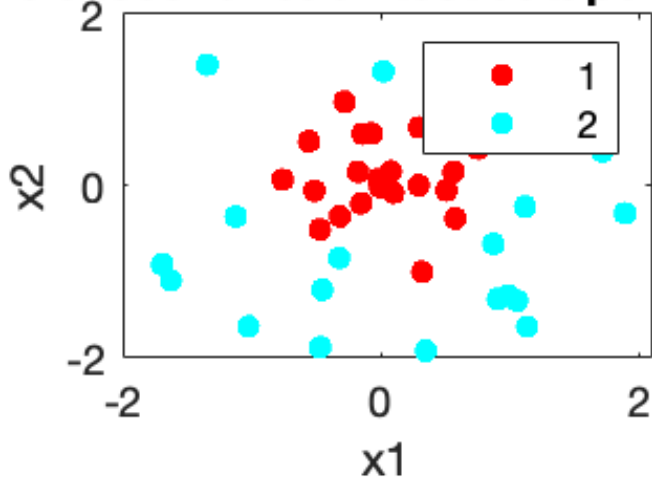

The models accuracy on the test dataset, with a hidden layer of size two, is 85.00

**Classes for each training datapoint**

The models accuracy on the training dataset, with a hidden layer of size ten, is 99.38

## Classes for each test datapoint(1

The models accuracy on the test dataset, with a hidden layer of size ten, is 92.50
